## Parkwyse Software Modules

Parkwyse software has several modules including:-

- 1. Parkwyse Season :** This is an access control module that handles the management of season / pass card park-ers, including staff, tenants and permanent parkers.
- 2. Parkwyse Revenue:** Software that handles the setup of flexible tariff structures, processing of payment transactions, audit/financial-reporting setting of password and security controls, and overall site software setup.
- 3. Parkwyse Equipment / accessories:** The software enables integration of several equipment /accessories to operate together . Some of these equipment include; ticket Issuing machine (TIM), Validator, electronic barriers, discount reader, scanner, Electronic display, Telemetry equipment, remote printer, remote control centers and auto tags
- 4. Parkwyse reporting :** The module enables reports to be generated using a wide range of user defined parameters. Facilities exist to export reports to compatible Microsoft Office software for example to Excel and PowerPoint. Reports include:
  - Device reports for any individual devices for any period of time.
  - Parker usage for any individual or block of cards for any period of time .
  - Parked period for any individual entry or exit or zone or parking for any period of time including number and value of parking.
  - Financial report for any shift period, historical data, daily /weekly/ monthly reporting, individual or group of cashiers/users, individual or group of payment stations.
- 5. Parkwyse Help**
  - A help module with detailed how to instructions, context sensitive search and tips.
